TROPICAL CYCLONE BULLETIN NO. 14

Typhoon BETTY (MAWAR)

Issued at 11:00 AM, 30 May 2023 Valid for broadcast until the next bulletin at 5:00 PM today.

TYPHOON BETTY MAINTAINS ITS STRENGTH AND IS NOW MOVING WEST NORTHWESTWARD OVER THE SEA EAST OF BATANES

Location of Center (10:00 AM)

The center of the eye of Typhoon BETTY was estimated based on all available data at **315 km East of Basco, Batanes (20.5°N, 125.0°E)**

Intensity

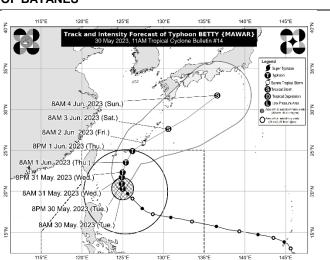

Maximum sustained winds of **150 km/h** near the center, gustiness of up to **185 km/h**, and central pressure of **955 hPa**

Present Movement

West northwestward at 10 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to 630 km from the center

TRACK AND INTENSITY FORECAST								
Date and Time	Center Position			Intensity		Movement		
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)		
12-Hour Forecast 8:00 PM 30 May 2023	20.9	124.9	320 km East of Itbayat, Batanes	150	ΤY	N Slowly		
24-Hour Forecast 8:00 AM 31 May 2023	21.7	124.9	335 km East Northeast of Itbayat, Batanes	150	ΤY	N Slowly		
36-Hour Forecast 8:00 PM 31 May 2023	22.3	125.0	370 km East Northeast of Itbayat, Batanes	140	ΤY	N Slowly		
48-Hour Forecast 8:00 AM 01 June 2023	23.5	125.4	475 km Northeast of Itbayat, Batanes	130	ΤY	NNE 10		
60-Hour Forecast 8:00 PM 01 June 2023	24.9	126.2	640 km Northeast of Itbayat, Batanes	120	ΤY	NNE 15		
72-Hour Forecast 8:00 AM 02 June 2023	25.9	127.6	820 km Northeast of Extreme Northern Luzon (OUTSIDE PAR)	110	STS	NE 15		
96-Hour Forecast 8:00 AM 03 June 2023	27.6	130.6	1,170 km Northeast of Extreme Northern Luzon (OUTSIDE PAR)	85	TS	ENE 15

TROPICAL CYCLONE BULLETIN NO. 14

Typhoon BETTY (MAWAR)

Issued at 11:00 AM, 30 May 2023 Valid for broadcast until the next bulletin at 5:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT							
TCWS No.	Luzon	Visayas	Mindanao				
2	Batanes and the northeastern portion of Cagayan (Santa Ana, Gonzaga) including Babuyan Islands	-	-				
Wind threat: Gale-force winds	Warning lead time: 24 hours Range of wind speeds: 62 to 88 km/h (Beaufort 8 to 9) Potential impacts of winds: Minor to moderate threat to life and property						
1 Wind threat: Strong winds	The rest of mainland Cagayan, the northern and eastern portions of Isabela (Santo Tomas, Santa Maria, Quezon, San Mariano, Dinapigue, Delfin Albano, San Pablo, Ilagan City, Benito Soliven, Tumauini, Cabagan, Palanan, Quirino, Divilacan, Gamu, Maconacon, Naguilian, Mallig), the eastern portion of Ilocos Norte (Piddig, Bangui, Vintar, Marcos, Pagudpud, Banna, Adams, Carasi, Dingras, Solsona, Dumalneg, Nueva Era), Apayao, the northern portion of Kalinga (City of Tabuk, Balbalan, Pinukpuk, Rizal), and the northeastern portion of Abra (Tineg, Lacub, Malibcong)	-	-				
	Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property						

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Forecast accumulated rainfall from today to tomorrow morning

• **50-100 mm:** Batanes, the eastern portion of Babuyan Islands, the northeastern portion of mainland Cagayan, Ilocos Norte, Ilocos Sur and the northern portion of La Union.

Forecast accumulated rainfall from tomorrow morning to Thursday morning

• 50-100 mm: Ilocos Sur and La Union.

Under these conditions, **flooding and rain-induced landslides are possible**, especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

For more information on the areas affected by rains from the **Southwest Monsoon enhanced by BETTY**, refer to the **Weather Advisory #3 for Southwest Monsoon** issued at 11:00 AM today and the **24-Hour Public Weather Forecast** at 4:00 AM today.

Severe Winds

- Minor to moderate impacts caused by gale-force winds remain possible within the areas where Wind Signal No. 2 is hoisted. Minimal to minor impacts from strong winds (i.e., strong breeze to near gale strength) are also possible within any of the areas where Wind Signal No.1 is currently in effect.
- The enhanced Southwest Monsoon and outer periphery of the typhoon circulation will also bring **occasional gusts** in the next 24 hours over Bicol Region, Western Visayas, Aurora, Quezon, Mindoro Provinces, Marinduque, Romblon, Northern Samar, and the rest of Cordillera Administrative Region and Ilocos Norte that are not under any Wind Signal.

TROPICAL CYCLONE BULLETIN NO. 14

Typhoon BETTY (MAWAR)

Issued at 11:00 AM, 30 May 2023 Valid for broadcast until the next bulletin at 5:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

Under the influence of Typhoon BETTY and the enhanced Southwest Monsoon, a **marine gale warning remains in effect** over the seaboards of Northern Luzon, eastern seaboards of Central Luzon, the seaboards of Southern Luzon, and the seaboards of Visayas. For more information, refer to **Gale Warning #6** issued at 5:00 AM today.

TRACK AND INTENSITY OUTLOOK

- Typhoon BETTY is forecast to generally move slowly between today until tomorrow as it turns more northward over the waters east of Batanes. Afterwards, the typhoon will gradually accelerate north northeastward on Thursday and northeastward on Friday, bringing its center over the waters southeast of the Ryukyu Islands. Typhoon BETTY may exit the Philippine Area of Responsibility on late Thursday or Friday early morning.
- This typhoon is forecast to steadily weaken over the next five days due to cooler ocean waters (caused by upwelling of cooler waters in its wake), dry air intrusion, and increasing vertical wind shear. BETTY may be downgraded into a severe tropical storm on late Thursday or early Friday and into a tropical storm on late Friday or early Saturday. However, given the extent of the effect of dry air intrusion on the typhoon, a faster weakening rate within the forecast period is not ruled out.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 5:00 PM today.
